PIZZA SHAPING MACHINE BE-IT-0045 | ITEM: 45356

TECHNICAL SPECIFICATIONS

| | |
|----------------------|---|
| ITEM NUMBER | 45356 |
| MODEL | BE-IT-0045 |
| POWER | 8.10 kW |
| DOUGH WEIGHT | 551.15 - 1102.31 lbs. / 250 - 500 kg. |
| LOWER PLATE DIAMETER | 17.7" / 450 mm |
| UPPER PLATE DIAMETER | 17.7" / 450 mm |
| PLATES TEMPERATURE | 130°C - 170°C / 266°F - 338°F |
| ELECTRICAL | 230V / 60Hz / 1Ph |
| DIMENSIONS (LWH) | 24.8" x 26.4" x 35" / 630 x 670 x 890 mm |
| PACKAGING DIMENSIONS | 28.3" x 36.6" x 40.2" / 720 x 930 x 1020 mm |
| WEIGHT | 280 lbs. / 127 kg. |
| PACKAGING WEIGHT | 331 lbs. / 150 kg. |

FOOD EQUIPMENT

PIZZA SHAPING MACHINE BE-IT-0045 | ITEM: 45356

PRODUCT DETAILS

- The plates, as they are made out of adhesive proof aluminum, have fast heating times that, together with a reduction in the set temperature from 150/170°C to 130°C due to a special surface treatment, permit significant energy savings; this treatment makes it easy to slide the pizza disk.
- The high quality of the dough is maintained due to the lower temperature.
- Due to their particular structure, disks of dough can be obtained with a traditional edge.
- The distance between the plates ranges is 115 mm.
- The pressing time (from 0.1 to 1.5 sec) and the temperature (150°C-170°C) vary depending on the dough temperature (recommended between 6°C and 20°C).
- The dough thickness can be easily adjusted by rotating the handle located under the lower plate.
- If the protective grid is removed, make sure to reassemble it correctly for proper machine operation, otherwise it may not restart.
- The grid can be removed to make it easier and quicker to clean the plates after they have cooled down.
